Process / Quality

We use fully automated welding equipment and advanced technology from Lincoln – USA for all pressure parts welding to ensure the production of defect free products, maintaining the highest standards of quality and reliability

Our finishing lines are integrated with fully automated surface preparation and surface protection systems, by using the latest powder coating technology from the USA. This ensures a durable and high quality finish for all our products.

"Quality is the best business plan"

Haifa having an in house testing facility located within the company's premises. This dedicated space is equipped with the necessary tools and equipment to conduct a variety of tests and evaluations on products, components, and materials. These facilities are specifically designed to meet compliance verification standards, allowing us to maintain greater control over the testing process, reduce turnaround times, and ensure the quality and reliability of our products before they reach to the market.

To further ensure compliance and meet client requirements, all testing and acceptance processes are conducted through reputable third-party companies such as Bureau Veritas, TUV, Applus, and SGS Etc...
